

POST TREATMENT

AFTER CARE

- Keep the treated area hydrated by applying a moisturizer or serum regularly.
- A daily hydrating mask can be applied to boost the skin regeneration.
- Apply a broad-spectrum sunscreen with an SPF of 50+.
- No make up for 24 hours.
- If you experience prolonged erythema and/or heat, a cool compression may help relieve the symptoms.
- Before touching your face or applying skin products, make sure to wash your hands thoroughly as it may cause bacterial infection due to open microchannels.
- Avoid any exfoliation on the treated area for 7 days.
- Avoid excessive alcohol for a week and lifestyle that would contribute to stress.
- Avoid saunas, spas, and strenuous exercise to prevent further inflammation until the skin returns to normal.
- Existing acne can be temporarily exacerbated post-treatment but it usually resolves within a week.
- Do not pick or squeeze pimples or acne if any as it may cause pigmentation.
- Avoid the use of skin care products containing active ingredients such as AHAs, Retinoids, and Vitamin C until your skin returns to normal

POTENTIAL COMPLICATIONS

- Minor flaking, dryness and peeling may last 7-10 days.
 - Micro scabs may form but will fall off within a few days (7~10 days for face).
 - You will see small blebs on your face after the Rejuran injection, however the blebs will disappear in 3 days.
 - Swelling and bruising can occur on the day of treatment, bruising may surface in a couple of days after treatment and may last up to 2 weeks.
 - Moderate erythema (redness), swelling and skin sensitivity (3-7 days).
 - Post-inflammatory hyperpigmentation (darkening of the skin) : This can last from 2 weeks to 12 months and may resolve itself, however, you may need a prescribed cream to promote the healing the process faster.
 - Development of infection that in rare cases could lead to scarring caused by picking, and failure to follow aftercare instructions.
- Petechiae (pinpoint red spots caused by bleeding) may occasionally occur immediately after treatment.

If you experience any of the above potential complications more than 7-10 days post-treatment, please do not hesitate to call us on 08 9389 9099
