

# ENLIGHTEN TATTOO REMOVAL AFTERCARE

## *Recommended Pre & Post Care for Tattoo Removal Treatments with enlighten system*

For best results please follow these instructions

### **Before your treatment:**

- Do not wear makeup on the day of treatment
- No sun-tanning or self-tanners 4 weeks prior to treatment
  - Includes spray tans, tanning lotions, tanning beds, sun exposure, etc.
- Some medications or supplements may increase the risk bruising. Consult with your physician.
- Avoid treatments that may irritate the skin for 1-2 weeks prior to treatment (waxing, depilatories, etc.)
- Notify clinic with any changes to your health history or medications since your last appointment
- History of herpes or cold sores may require an anti-viral prescription prior to treatment

### **After your treatment:**

- Avoid sun exposure for 2 to 4 weeks following treatment and use a broad spectrum (UVA/UVB) sunscreen.
- Avoid skin irritants (products containing tretinoin, retinol, benzoyl peroxide, glycolic/salicylic acids, astringents, etc.) until the skin is fully healed and all crusting has resolved.

### **PATIENT WOUND CARE INSTRUCTIONS**

- Dressing should be changed once a day or after a shower in the first three days of treatment.
- Prior to removing the dressing, wash hands with soap and water, then carefully remove the dressing, gently cleanse the wound with soap and water and pat dry with a clean towel.
- Apply Aquafor® or simple petroleum and cover with a large band-aid or non-stick gauze dressing and make sure the bandage is not too tight.
- Some patients may require help of another person to reach treatment area on back.
- Try not to bump or stretch treated tattoo.
- Scabbing over the treatment area is expected and may last 7 to 14 days.
- Do not pick scabs and avoid scrubbing the treated area when bathing.
- Do not unroof blisters if they occur. Contact physician's office if blisters are uncomfortable.
- Only non-aspirin over-the-counter pain drugs such as acetaminophen should be taken for discomfort after the laser treatment.

### **Contact office if any of the following occur:**

- Bleeding that soaks the dressing or bleeding that happens after the first 24 hours
- Increased redness or swelling
- Uncomfortable blisters
- Yellowish or greenish drainage coming out of the wound
- Persistent pain that last more than 24 hours
- Fever
